- 2018-2019 **IdeaLab - Laboratório de Ideias de Negócio**, *TecMinho, Universidade do Minho*, Business ideas acceleration program that supports their development and market potential, from a socio-economic perspective. Over the course of four months, entrepreneurs are accompanied by a team of tutors and mentors, who provide a set of workshops related to the study and validation of business ideas and carry out tutoring, networking and coaching activities..
- 2012- 2018 **Mestrado Integrado em Engenharia de Telecomunicações e Informática**, *Universidade do Minho*, Broad spectrum course that covers two major areas of Engineering: Electronics and Informatics. In more traditional Engineering courses, these two areas are considered separately, giving rise to courses in Electrical Engineering or Electronics and Computer Engineering. However, the convergence of these two areas allows a comprehensive and integrated approach to the study of Communications Systems and Networks. In this way, the Master in Telecommunications and Informatics Engineering holds skills in different technological aspects, including areas ranging from the coding and transmission of information to computer communication networks, mobile systems and networks, network management and operation. and communication systems, as well as the new services and applications supported by modern integrated telecommunications systems. Delivery of the dissertation to be completed.
